

## **IKUSI's INTEGRATED MANAGEMENT POLICY QUALITY-PREVENTION-ENVIRONMENT**

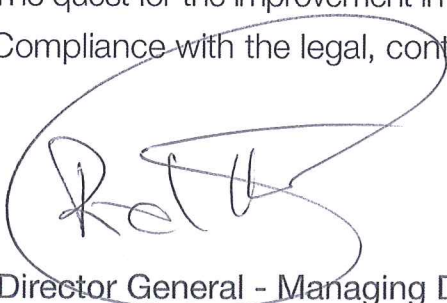

IKUSI is dedicated to addressing the needs and expectations of its interest groups, understood as customers, people who work in and for the Organisation, society, suppliers and other alliances and shareholders.

### **So we are geared towards:**

- Supplying, on time, products that are reliable and comply with all the contractual, legal and technical requirements applicable.
- Developing technological solutions that provide the customer with value in the sphere of infrastructure management.
- Focussing on the management and ongoing improvement of processes in the sphere of quality, prevention and the environment.
- Encouraging a prevention-based culture in IKUSI.
- Driving forward training in prevention matters across all levels of responsibility.
- Integrating prevention into all our activities and processes.
- Cutting the environmental impact of our products, processes and solutions by establishing and reviewing objectives and goals that target contamination prevention.

### **And we are underpinned by:**

- The application of the available technical improvements and ongoing innovation in our products and projects.
- The effective management of R&D projects in the area of electronic equipment and telecommunications systems.
- The quest for the improvement in working conditions and interaction with the environment.
- Compliance with the legal, contractual and technical requirements that are applicable.
