

HDTN-694V UHF Nano antenna

Art. Ref. 1825

Versatility in the pallet

LTE rejection

Medium gain

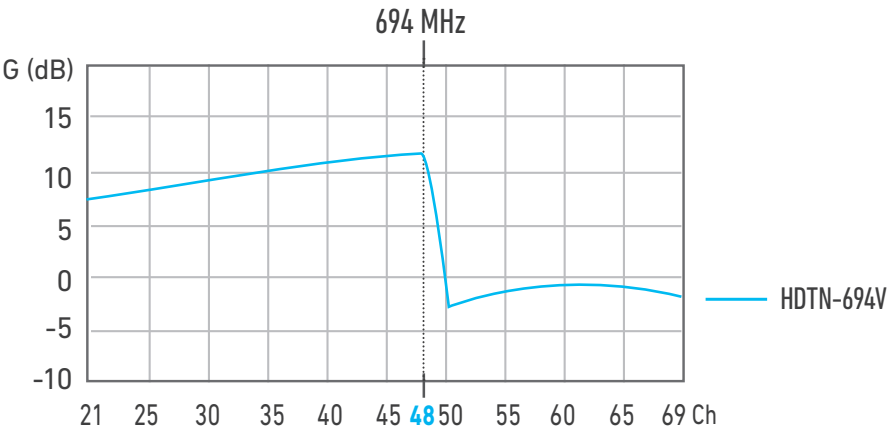

Without tools

Mains feature

- The smallest antenna range FLASHD for reception of TV signals in the UHF band, formed by a dihedral reflector made up of four aluminium tubes and a dipole.
- For vertical and horizontal polarization, allowing variation of elevation angle.
- Minimum packaging volume for transport and easy assembly without tools.
- Versatility in the pallet from 30cm to the desired height, in increments of 10 cm
- Cable connection: F type connector. 1 screw-on plug and 1 rubber protection cap are supplied.
- Clamping system for masts Ø 25 to 50 mm
