

Apartament amplifiers ATP-400 series

Models for terrestrial signals, adapted to the 1st and 2nd Digital Dividend.

Ideal for extending the household network

Models adapted to the 1st and 2nd Digital Dividend

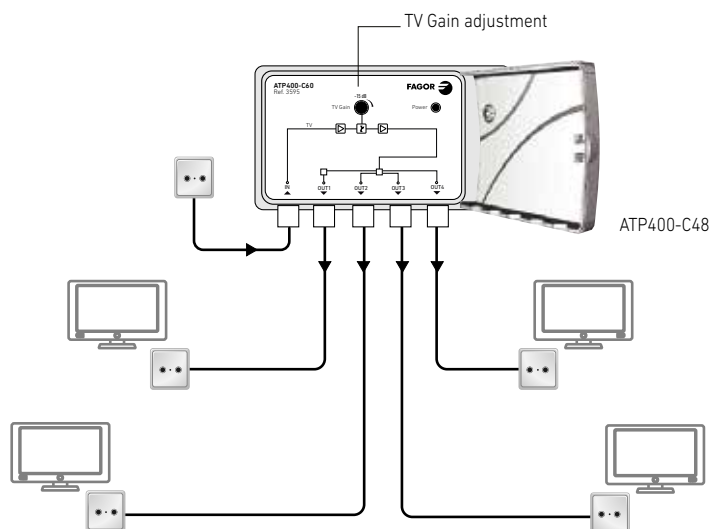

Gain adjustment

Main features

- Models adapted to the 1st and 2nd Digital Dividend.
- Terrestrial signals.
- Gain adjustment potentiometers.

MODEL	REF.	ATP-400 series	
ATP-400-C69	3594	Frequencies MHz	47 - 862
ATP-400-C60	3595		47 - 790
ATP-400-C48	3596		47 - 694
Input		1	
Output		4	
Gain	dB	>22	
Gain adjustment	dB	>15	
Output level	dBμV	103 IMD3 -60dB (DIN 45004B)	
Noise figure	dB	<4	
Mains supply voltage	VAC	100 - 240	
Consumption	W	<3	
Dimensions	mm	135 x 70 x 30
